

## Competition for the Scientific Award named after Prof. Nernst

Published by: Adam Żeberkiewicz

The Institute of Power Engineering - National Research Institute is organizing the competition for the Scientific Award named after Prof. Walther Hermann Nernst for the 6th time.

The award was established jointly by The Institute of Power Engineering - National Research Institute and the Warsaw University of Technology. The awards are individual distinctions awarded for significant scientific, technical and practical achievements related to electrochemical processes (electrolyzers/fuel cells). The awards are granted to Polish researchers or foreigners employed in Poland who are under 50 years of age. The aim is to distinguish researchers who make a special contribution to the development of hydrogen technologies.

More information can be found on [the Institute's website](#).

We encourage you to submit applications. In case you have any questions, please contact the organizers.
